Touch Pen 200 Series

Functional Stylus for Capacitive Touch Screens

The *Touch Pen 200 series* is the next generation of high quality stylus pens in three functional styles to use with any capacitive touch screen. They are designed to help prevent scratching your touch screen devices with a super soft and flexible stylus tip, and they also keep the screen clean and clear of smudge marks. The highly sensitive and lab certified durable pen tip provides precision control in any application.

Touch Pen 200 series makes it easy to write, sketch, tap and even play games for long hours. The pen tip is replaceable, so it can be purchased and replaced easily. Choose from three different pen designs to find one that fits your style. *200S* is a compact design with a convenient adapter plug for storage and is available in two colors. *200M* has three magnetic circles to stick to the side of a iPhone 5/4S/4, iPad 2 or New iPad, and it can also activate iPad 2+ from screen saver mode. *200D* is streamline design with dual heads of 6mm and 8mm to use in different settings.

The *Touch Pen 200 series* is a smart design, suitable for trend leaders.
